Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editor

Dear Colleagues,

The impact of the construction sector on the environment is extremely significant. Therefore, the assessment of the quality of architectural design is key in sustainability.

In addition, considering the entire life cycle of buildings, the maintenance process is increasingly important, especially in terms of cultural heritage. We can no longer afford to consider the life of buildings as limited in time, and we also need to learn from the past, as significant buildings have changed their function from having limited to few users to becoming open to a large number of tourists. We must strive for the infinite reuse of buildings and of the materials used in the construction sector, even taking into account climate changes. For these reasons, I am hence calling for the submission of both research and review papers worldwide which relate to the following and related topics:

- Project assessment tools;
- Sustainable buildings;
- The re-use of materials;
- Maintaining, upgrading, repairing, and adapting constructions;
- Cost evaluation;
- Cultural heritage maintenance and management;
- Buildings in changing environments;

USA

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
