Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editor

Health and economics are inextricably linked; the Preston curve has shown the correlation between GDP and life expectancy across countries and years. This potential causal relationship is bidirectional; increases in health can lead to increases in productivity and economic growth can facilitate investment in a robust public health system. While most associations are positive, there is also a potential for negative associations as well, especially as global development tends to increase levels of pollution, the burden of which is disproportionately borne by those of lower economic and social status.

### Keywords

- pollution
- waste management
- sustainable development
- women's empowerment
- global health
- impact evaluation
- nutrition
- government spending

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
