Message from the Guest Editor

Dear Colleagues,

It is important to understand the influence of the digital economy on the development of sustainable innovation and business strategies focused on environmental protection, energy savings, and pollution reduction. In this regard, it is necessary to analyze how a green technological innovation strategy can benefit from digital financing policies and improve investment in research and development for sustainable innovation, both by small- and medium-sized enterprises and by large corporations, which is crucial for green production in the digital era.

Sustainable economic development depends on software and business-enabling technologies that support green innovation in various industries and address the social challenges arising from the digital economy.

This Special Issue aims to improve the understanding of the effect of the digital economy on sustainable innovation and business management strategies, involving different variables and contexts that impact the sustainable management practices adopted in the production of products and services for sustainable markets.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
