Message from the Guest Editors

The aim of the Special Issue is to examine the impact of energy policies on the sustainable development of global energy markets. Energy policies are directly linked to the United Nations Sustainable Development Goal (SDG) 7, which aims to ensure access to affordable, reliable, sustainable, and modern energy for all. To achieve SDG 7, countries need to develop and implement effective energy policies that prioritize the use of renewable energy sources and promote energy efficiency. This involves investing in clean energy technologies, improving energy infrastructure, and providing energy access to underserved communities. Moreover, energy policies have a significant impact on the achievement of other SDGs, such as SDG 13 on climate action; SDG 8 on decent work and economic growth; and SDG 9 on industry, innovation, and infrastructure. For instance, energy policies that promote the use of renewable energy sources can help reduce greenhouse gas emissions and mitigate the effects of climate change, while also creating jobs and promoting economic growth.

We kindly invite high-quality papers that concentrate on energy policies and the worldwide energy market for the Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
