Message from the Guest Editors

Dear Colleagues,

Currently, green and low carbon, energy savings, and environmental protection have become the consensus for enterprises. Rather than purely examining financial performance, ESG (Environmental, Social, and Governance) is a new evaluation concept that focuses on the sustainable development of enterprises from three dimensions: comprehensive environment, social responsibility, and corporate governance. This Special Issue aims to conduct an in-depth discussion and research on topics at the theoretical, methodological, and application levels, either by empirically testing existing theories or by attempting to discover or construct new analytical frameworks to solve the practical dilemma of corporate ESG performance in the process of digital transformation. Topics of interest include:

Digital economy and the high-quality development of enterprises;

Factors driving the digital transformation of enterprises;

Evaluation of corporate digital transformation capability;

ESG evaluation systems in the context of digital transformation;

Digital transformation and corporate ESG in the context of carbon peaking and carbon neutrality goals.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
