Message from the Guest Editor

This Special Issue, titled “Water Quality and Waterborne Microbial Resources”, encourages contributions from all around the world and welcomes original research papers or reviews including (but not limited to): (1) Monitoring chemical/microbiological quality of water or the water environment. (2) How does the microbial and chemical quality of water affect food and agricultural safety? (3) How does contaminated water affect the spread of infectious diseases to workers or consumers? (4) The distribution of microbiota or microbial resources in water or water environments. (5) Coexisting microorganisms of plants or animals that survive in water environment. Finally, (6) Discovering microbial resources relevant to climate change and nature heritage conservation. The articles published in this Issue will supplement the existing literature on the abovementioned aspects.

Keywords

- microbial diversity (fungi, bacteria) in water, water environment, or ecotone
- environmental conservation using microbial resources
- water quality monitoring (ground, sea, and tap water)
- water quality and food/agricultural safety
- water quality public health (waterborne disease)

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
