

Patterns and Drivers of Urban Greenspace and Plant Diversity

Guest Editor:

Prof. Dr. Huafeng Wang

Sanya Nanfan Institute, College of
Tropical Crops, Hainan
University, Haikou 570228, China

Message from the Guest Editor

We propose this Special Issue at a time when society is undergoing rapid urbanization, and sites of urban development are experiencing considerable ecological changes, such as a loss of native species, urban heat island effects, as well as others. We welcome submissions covering the following research areas:

Deadline for manuscript
submissions:

30 April 2025

1. The distribution patterns and driving mechanisms of urban plant diversity;
2. The temporal and spatial variations in urban greenspace with rapid urbanization;
3. The relationships between urban plant diversity and above-ground biomass;
4. Plant–animal–fungal interactions in urbanized areas;
5. Ecological service functions (e.g., regulating the microclimate) of urban plant diversity and greenspace.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
