### Message from the Collection Editor

Dear Colleagues,

A restorative economy restores the capacity for the well-being of people and the planet. As emissions and waste increase and accumulate, they place growing burdens on the environmental and social context systems into which they are released.

This Special Issue seeks examples of a reconceptualized restorative economy, with healthy and thriving restorative sink capacities as well as sustainable resourcing capacities. Submissions can focus on carbon sequestration, ecosystem restoration, reduced stress and better health outcomes in thriving environmental and social context systems.

We seek contributions addressing various strategies that could assist in establishing a restorative economy, including technical solutions, institutional alternatives, behavioral changes, and novel valuation approaches. Both theoretical and practical papers will be considered with the goal of assembling a robust body of works on restorative economics capable of reducing emissions and waste, strengthening environmental and social processing capacities, and sustaining the well-being of people and the planet in the long run.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (*Geography, Planning and Development*)
