Message from the Guest Editor

The special issue will focus upon agricultural innovations which have as their objectives the minimization of adverse environmental impacts and climate change adaptation. The issue will also look at policy and legislative initiatives to support agricultural sustainability. The issue will consider the contribution of local and indigenous knowledge to climate change adaptation. This will include both agricultural methodologies and the adoption of climate resilient orphan crops.

The special issue will supplement the existing literature by its focus on practical examples of climate-sensitive agricultural innovations and the regulatory infrastructure for agricultural innovation.
