### Message from the Guest Editors

In line with the United Nations' Sustainable Development Goals, the quest for sustainable transport and land use is paramount in shaping a sustainable future. The interdependence between transport and land use constitutes a fundamental nexus that collectively molds the structural, societal, and economic essence of cities, communities, and human habitation. It is universally acknowledged that transport affects land use by shaping its accessibility, while land use exerts its impact on transport through human activities. The evolving dynamics of urban spaces, accelerated by technological advancements and changing societal norms, underscore the need for innovative, sustainable solutions in land use planning and transportation systems.

This Special Issue aims to delve into the intricate relationship between sustainable transport and land use, offering insights into how their synergy can be harnessed for a sustainable future. We invite contributions that present novel case studies and methodological and theoretical advancements in this field.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
