Message from the Guest Editors

Dear Colleagues,

The availability of clean and sustainable energy on a large scale is a challenge in terms of common economic factors such as the cost and security of supply. The rapid development of renewable energies and their increased market penetration makes it increasingly necessary to look at them from an economic perspective. The purpose of this Special Issue is to contribute to the encounter between research from technological fields and that coming from economics. In this way, the Issue intends to specify the most relevant technical, regulatory, and economic aspects to achieve clean and sustainable energy, in line with the Sustainable Development Goals of the United Nations: specifically, Goal 7, "clean and sustainable energy".

Issues of interest for this Special Issue include, but are not limited to, the following:

- Renewable energies;
- Energy efficiency;
- Large-scale deployment of renewable energy sources;
- New business models;
- Remuneration of renewable production;
- Self-consumption and the role of prosumers.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
