### Message from the Guest Editors

Dear Colleagues,

The increasing environmental concerns and the negative impact of industries on societies call not only for the better use of decision-making tools and techniques for managing supply chains but also the further development of optimisation techniques. This Special Issue aims at proposing and demonstrating new insights into sustainable supply chain and inventory management. To this end, we invite manuscripts that conduct research on sustainability issues in supply chain and inventory management applications, as well as operations research/operations management or life cycle assessment approaches. Topics of interests include, but are not limited to, the following:

- Sustainability in supply chain configuration;
- Data-driven decision making and sustainability in supply chain and inventory management;
- Sustainability in (agri-food) supply chain operations;
- Reduction of energy consumption in supply chains;
- Collaboration and sustainability in supply chains;
- Behavioral factors and sustainable supply chain and inventory management;
- Circular/Closed-loop supply chain management.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
