submissions:

closed (31 December 2020)

Message from the Guest Editors

The Internet of Things (IoT) refers to a system of connected things/devices through a network that have the ability to transfer data without human intervention. IoT devices are increasing day by day, and it is estimated that they may reach 80 billion by 2025. This huge amount of data needs to be handled smartly to deduce the meaning of the data and employ it for decision making to promote growth in business.

In this Special Issue, we are open to contributions (research papers and review papers) exploring the role of AI, Big Data, and blockchain in IoT. This includes frameworks and architectures of IoT after merging of AI, Big Data and blockchain, emerging applications of AI, Big Data and blockchain in IoT, and implementation of security in IoT using blockchain technology. Contributions describing the applications of Big Data in alleviating natural disasters, pandemic diseases, ensuring road safety, and mitigating environmental pollution are also welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
