Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editor

The COVID-19 pandemic offers an opportunity to obtain fundamental answers concerning how air quality would be altered if human and economic activities were largely reduced. Such a question is definitely difficult to be resolved via calculations and simulation models. *Sustainability* is an international, cross-disciplinary, scholarly, peer-reviewed, and open access journal of the environmental, cultural, economic, and social sustainability of human beings. Novel and scientifically sound contributions will be processed expeditiously so the information can be timely disseminated to the scientific community and the public. We are calling for contributions on papers addressing air quality change in association with the COVID-19 pandemic. We seek papers on following topics:

- Changes in air quality related to the control of COVID-19;
- The health and economic effects of the changes in air quality during the COVID-19 control period;
- Physicochemical characteristics of particulate matter during the COVID-19 control period;
- Source apportionment of particulate matter during the COVID-19 control period ;
- The policy implications for air quality changes during the COVID-19 control period.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
