Message from the Guest Editors

In recent years, sustainability has emerged as an important business strategic outlook, expanding beyond organizational boundaries to include the supply chain. To become high performers in the new landscape, companies are driven to create new ways to demonstrate environmental and social responsibility, introducing innovation to business processes, management practices, products, and services; hence, it has drawn much attention in today's supply chain management research.

The aim of this Special Issue is to present original and high-quality research papers regarding achieving and maintaining supply chain sustainability. We welcome a wide variety of methodologies for this Special Issue, including empirical surveys, secondary data, case studies, bibliometric analyses, and narrative literature reviews, as well as conceptual papers.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
