### Message from the Guest Editors

In recent decades, 5S methodologies have undoubtedly been of great help in the development of sustainable technologies. Lean 5S methodologies are evolving towards lean 6S, and even beyond, involving factors such as safety, productivity, etc. The main objective of the lean tool is to improve working conditions, safety, working climate, personal motivation, and efficiency. As a result, quality, productivity, and competitiveness are improved.

The aim of this Special Issue “Advances in Sustainable Technology: The Lean 6S Methodology” is to gather results from the most advanced work currently being developed in the field of lean 6S methodologies. This compilation will undoubtedly be a great step forward in fostering and disseminating academic knowledge in the field of lean 6S methodology.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
