Deadline for manuscript  
submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

The aim of this Special Issue is to promote the idea of change, to inspire the interest of study, and to examine the research frontier on soil degradation and land change, a severe challenge that we are facing today. Soil quality degradation is an obvious barrier to support global population growth and may undermine the economical recovery in the post-epidemic epoch. Naturally, it is highly related to the sustainability of the agricultural system, which is also one of the scopes of the journal Sustainability.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Cultivated Land Change;
- Soil Fertility;
- Soil Pollution;
- Soil Remediation;
- Soil Desertification;
- Soil Salinization.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
