Message from the Guest Editor

Dear Colleagues,

In the 20th century, humans have changed ecosystems on a scale and at a speed that has never been seen before in history. By collecting rigorous and innovative studies in this Special Issue, we hope to provide useful information for a broad audience of scientists, engineers, and policy makers, in order to facilitate the solution of critical air pollution and other related environmental problems.

In this Special Issue, we welcome significant original papers including research article, critical review, policy analysis, perspective, correspondence, etc., focusing on the following topics:

1. Air pollution characteristics, temporal and spatial variation, and emission sources;
2. Economical, social, and health impacts of air pollution;
3. Interaction and synergistical mitigation of air pollution and climate change;
4. Human activities that have great impact on air quality, such as energy use, land use, etc.;
5. Policies and technologies to prevent and mitigate air pollution.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
