closed (15 October 2021)

Message from the Guest Editors

In this Special Issue, we would like to address the sustainability of animal production systems, including environmental, economic, ethical, governance, and societal aspects (specifically animal welfare) and their interactions.

We invite original research papers that focus on the extent to which the sustainable development goals (SDGs) are compatible, or not, with improving animal welfare. Studies can, for example, relate to the animal welfare consequences of reducing the sector's impact on natural resources and biodiversity, or the effects of more animal-friendly housing and management conditions on SDGs or defining sustainable development options that include good animal welfare. Papers may also address underlying structural, organizational, market, and trade aspects that affect the interaction between SDGs and animal welfare.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
