Deadline for manuscript  
submissions:  
**closed (30 June 2019)**

### Message from the Guest Editor

Dear Colleagues,

In the past, only human uses of water—including consumption, navigation, and industrial processes—were the goals of water resources management. The expansion of this definition has led to the emergence of the ecosystem approach, in which the interests of natural resources are included in addition to human uses. Unresolved issues associated with the ecosystem approach that will be further studied in this Special Issue include: (1) choosing the specific parameters and goals of ecosystem-based water resources management and (2) determining the appropriate geographical scale and boundaries for ecosystem-based management.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
