Message from the Collection Editor

Dear Colleagues,

Aquaculture is one of the most important food production industries in the world. However, the industry itself causes a heavy impact on the aquatic environment. There are various environmental problems in the aquaculture field, such as the problem of fish meal for feed produced by natural fish; the problem of fish disease, drug administration, and the generation of drug-resistant bacteria; and the problems of the water and/or sediment contamination of the aquaculture field. The papers of this Special Issue will contribute to solving these problems. Furthermore, they will greatly contribute to the development of a sustainable aquaculture system.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
