Deadline for manuscript submissions:

31 March 2025

Message from the Guest Editors

This Special Issue addresses critical scientific and technological advancements in sustainable ship design, shipbuilding, navigation, and efficient energy transportation. As global maritime activities contribute significantly to environmental pollution, there is an urgent need for innovative solutions that reduce ecological footprints while enhancing efficiency. Emphasis is placed on the development of new marine propulsion systems and alternative fuels, which are pivotal in reducing emissions and improving fuel efficiency. Additionally, the exploration of marine renewable energy systems offers promising avenues to sustainably power maritime operations. The lifecycle assessment of ships and marine engineering is also crucial to ensure long-term sustainability from construction through decommissioning. By examining the entire lifecycle, we can identify opportunities to reduce environmental impact at every stage. Furthermore, implementing effective regulatory and policy frameworks is essential to enforce sustainable practices and encourage the industry-wide adoption of green technologies.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
