Message from the Guest Editors

One of the main issues of the coming decades has been sustainability intended in its largest extent and leading to the “awareness of one’s role in a world where resources are finite and the negative effects generated by human activities risk being irreversible”; the second BEYOND ALL LIMITS conference (BAL 2022) aims to tackle the sustainability matter, placing it in the current international debate marked by the many-sided response to the pandemic.

The conference follows the milestones of the New European Bauhaus (NEB), with a co-creation space where architects, artists, students, engineers and designers work together towards the objectives of the European Green Deal with a human being design-centered approach.

This Special Issue aims to provide an important scientific and multidisciplinary contribution by presenting the state-of-the-art and recent developments regarding architecture, planning, design, energy efficiency, novel building technologies and sustainability according to the New European Bauhaus initiative, hopefully allowing us to be able to improve the beauty, sustainability and inclusion of places looking beyond the limits of current knowledge.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
