Message from the Guest Editors

This Special Issue calls for technical articles that address these critical issues and feature state-of-the-art research on the following topics:

- Integrating resilience and reliability concepts into design practices;
- Infrastructure planning and programming;
- Sustainable construction techniques;
- Smart construction materials;
- Infrastructure systems analysis and monitoring;
- Strategic infrastructure planning and construction under climate change;
- Green infrastructure designs to meet social, economic, and environmental objectives;
- Sustainable funding mechanisms for infrastructure development and maintenance.

We look forward to receiving your contributions.

Keywords: infrastructure systems; smart materials; resilient design; road construction; durability in design; reliability design

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
