

Multifunctional Binders for Sustainable Li-ion Batteries

Guest Editors:

Asst. Prof. Dr. Dervis Emre Demirocak

Department of Mechanical & Industrial Engineering, Texas A&M University – Kingsville, 700 University Blvd, MSC 191, Kingsville, TX 78363, USA

Dr. Sesha S. Srinivasan

Department of Engineering Physics, Florida Polytechnic University, Lakeland, FL 33805, USA

Deadline for manuscript submissions:

closed (30 June 2019)

Message from the Guest Editors

Li-ion battery technology has improved significantly over the last decade, thanks to the developments in the materials, engineering design and manufacturing of batteries. One of the critical components of Li-ion batteries is the binder that holds the active particles and inactive conductive additives of the composite electrodes in contact with each other and with the current collector. In this Special Issue, recent developments in multifunctional binders that are mechanically robust, chemically inert and electrically conductive are discussed. Papers invited to this Special Issue were subject to a rigorous peer review procedure with the aim of the rapid and wide dissemination of research results, developments and applications.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
