Message from the Guest Editors

Dear Colleagues,

The purpose of this Special Issue is to presents ways in which big data analysis can be applied to customer profiling, forecasting, clustering, classification, etc. for the sustainable growth of firms.

More specifically, the topics of interest include, but are not limited to:

- Improving predictive models using big data analytics;
- Deep learning from big data;
- Machine learning from big data;
- Recommender systems and big data;
- Customer relationship management and big data;
- Real-world applications of big data in commerce.

Thank you for your contributions

an Open Access Journal by MDPI

Editor-in-Chief

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
