Deadline for manuscript  
submissions:

**closed (31 March 2021)**

### Message from the Guest Editors

As the new coronavirus (COVID-19) holds the world in limbo, ending it as soon as possible has become an urgent, important task for mankind. New coronavirus outbreaks are announced each day, related statistics fluctuate rapidly, and enormous amounts of data are generated. In addition, lessons learned from similar pandemics in the past, such as SARS and MERS, have also created enormous amounts of data, sometimes called big data. Big data could potentially help us understand the nature of the new coronavirus, providing a source of information that can inspire prevention and treatment. Big data analysis may also facilitate prediction of structural changes in our society, economy, and lifestyle that may result from the current pandemic.

This special issue offers a platform to identify new issues, developments, and case studies related to the coronavirus to which big data analytics may be applicable. Data mining, disease determination, and predictions regarding the coronavirus pandemic may be possible through deep learning.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
