Message from the Guest Editor

Dear Colleagues,

An important purpose of this Special Issue is the presentation of new and actual research results of biofuel and forage processing and utilization technologies and technique. It is also important to evaluate these technologies from an energy and environmental point of view.

Main subject areas of this issue:

- System analysis methods, including life cycle assessment and management
- Sustainable chemistry
- Sustainable utilization of resources such as land, water, atmosphere and other biological resources
- New and renewable sources of energy
- Sustainable energy preservation and regeneration methods
- Land and aquatic ecosystems maintenance and biodiversity preservation
- Effects of global climate change on development and sustainability

This Special Issue will present state-of-the-art results for its intended purpose and will complement scientific information published in other scientific publications and journals.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
