submissions:

closed (15 December 2021)

Message from the Guest Editors

The primary focus of this SI will be to address the following research questions:

- How will Blockchain technologies help in improving supply chain management?
- What are the challenges for designing and implementing Blockchain technologies in sector-specific supply chains?
- How can advanced decision-making techniques help to enhance the supply chain effectiveness in Industry 4.0 and Blockchain era?
- How will Blockchain technologies integration help to improve the performance of supply chains involved with last-mile delivery?
- How can Blockchain technologies be integrated with Big Data and Industry 4.0 to improve the responsiveness and flexibility of supply chains?
- Will Blockchain technologies affect the resilience of the supply chains?
- How can OR models help to implement Blockchain technologies in the manufacturing sectors to enhance the sustainability of their supply chains?

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
