Message from the Guest Editors

A business ecosystem is a mutually dependent system interconnected by a loose foundation of various ecosystem members, including buyers, suppliers, competitors, and other stakeholders. In the current business environment, competition between firms has shifted to competition between business ecosystems. Thus, building a sustainable business ecosystem has become a new source of competitiveness. A business ecosystem is the foundation that enables sustainable management for the ecosystem member firms with collaboration and co-evolution within the ecosystem. We welcome conceptual models, empirical studies, case studies, and other qualitative studies on sustainable business ecosystems. This Special Issue provides strategic orientation for fostering sustainable business ecosystems in a variety of domains including tourism, innovation, ICTs, and entrepreneurship, and also to contribute to building a theory of business ecosystems and sustainable development in businesses.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
