### Message from the Guest Editors

The construction industry is a great contributor to a nation's total CO<sub>2</sub> emissions due to its resource-intensive characteristic and emission-intensive upstream activities. Addressing CO<sub>2</sub> emissions in the construction industry is gaining increasing attention and is becoming crucial for our sustainable future. Although green buildings can mitigate CO<sub>2</sub> emissions of buildings from a life cycle perspective, there is still a lack of in-depth analysis and discussion on their impact on the construction industry's overall CO<sub>2</sub> emissions. This Special Issue aims to present and discuss findings related to green buildings and CO<sub>2</sub> emissions in the construction industry, promoting scientific contributions to sustainability and sustainable construction. In this Special Issue, original research articles and reviews are welcome.

Deadline for manuscript  
submissions:

**5 May 2025**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
