Message from the Guest Editors

The concept of "Environmental Planning and Governance for Sustainable Cities" stands as an integrated approach that aims to manage human and natural resources, promote urban sustainability and resilience, and improve quality of life and work. Environmental planning is the process of designing and managing urban development in harmony with the surrounding environment and with natural resources. It involves assessing environmental risks, conserving natural resources, and promoting sustainable solutions. Sustainable cities must be designed with consideration of elements such as efficient public transportation, rational land use, waste management, energy supplies, carbon emissions, and the creation of green spaces and data-driven solutions. Environmental planning also helps to mitigate climate change by addressing challenges related to greenhouse gas emissions, evaluating climate risk and adaptation to climate change. This Special Issue aims to explore the multidimensional aspects of environmental planning and governance for sustainable cities, aiming to contribute to a deeper understanding of the challenges and opportunities in creating environmentally resilient urban environments.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [AGRIS](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
