### Message from the Guest Editors

Soil contamination has received extensive attention, including heavy metals, microplastics, antibiotics, etc. This Special Issue of Sustainability entitled “Soil Remediation: Current Research and Development” focuses on remote monitoring technology and its application to soil pollutants, the migration of soil pollutants and model construction, the development and application of in situ remediation and ex situ remediation technologies for site contaminated soil or agricultural contaminated soil. In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

Deadline for manuscript  
submissions:

**closed (31 March 2023)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
