submissions:

closed (15 April 2022)

Message from the Guest Editor

Environment protection with the sustainable development of human society is one of today's greatest challenges. This Special Issue of *Sustainability* focuses on articles and thematic challenges related to the sustainable production and consumption in the industrial and individual consumer scale. The development of environmental technologies is undoubtedly an important step in achieving environmental objectives. Without taking into account consumption and general human needs, sustainability will not be an achievable goal. The aim of this Special Issue is to bring together contributions aimed at reducing carbon footprint as well as the overall environmental impact of products and services. Sustainable technologies, technologies with lower carbon footprint, recycling and reuse of waste streams, sustainable energy, and fuels are all topics that are welcome in this special issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
