Message from the Guest Editors

The Special Issue will gather works that focus on collecting empirical data on innovative and sustainable transport modes and logistics systems adopted, worldwide, in the agri-food industry.

Works should focus both on consumer opinions about sustainable transport systems of foodstuffs fuelled with alternative carbon sources and on the farmer level to test the intention of firm managers to invest in alternative transport systems. Public policies, considered as the flywheel of concrete and huge infrastructural investments, could also be presented and discussed, particularly if the agri-food transport system is concerned with improving the sustainability of the sector. Finally, we welcome works that analyze urban scenarios but also rural ones, as we are aware that each one of these areas presents specific infrastructural, political, economic, and cultural peculiarities that must be taken into account in any modeling effort.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
