closed (16 August 2021)

Message from the Guest Editors

The focus will be on taking stock of current research, showcasing success stories and diving into challenges for the next decade regarding policy, research and practical actions. The aim is to collect up-to-date research papers that explore these and other pro-CE innovation questions, from different disciplines and with different methodological approaches, in the realization that a “new” kind of innovation pathway is needed to navigate through the Anthropocene. Within this framework of concerns, this Special Issue will include contributions that, in particular, cover the following fields:

- Eco-innovation as a vehicle to deep transition;
- Reconfiguring innovation systems toward a circular economy;
- Circular-economy products/services innovation;
- Innovation toward circular business models, cities and countries;
- Participatory innovation and consumers'/user-driven innovation toward a circular economy;
- Consumer acceptance of circular business models/products/ services;
- Circular innovation indicators;
- Transformative innovation;
- Challenge-based innovation missions;
- Future eco-innovation pathways toward a circular economy.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
