### Message from the Guest Editors

The purpose of the special issue is to share knowledge about challenges, barriers, opportunities, and best practices in the development of sustainable cities and infrastructures with special consideration to planning, management, technology, policies, and key sustainability metrics. We are interested in original contributions that explore new trends and possibilities across the globe and demonstrate real case study applications oriented at supporting the Sustainable Development Goal (SDG) framework.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but not limited to) the following:

Sustainable urban development

Decarbonization of cities

Building energy efficiency

Circular economy in the built environment

Low carbon materials and infrastructure

Urban heat Island mitigation and adaptation

Indoor/outdoor thermal comfort

AI technologies in sustainable cities

Urban air pollution

Post-carbon cities and societies
