Deadline for manuscript
submissions:
closed (31 December 2021)

Message from the Guest Editor

Dear Colleagues,

In recent years, the commercialization of these systems has led to a great deal of progress in various topics, such as concentrators, receivers, point and line focus technologies, process fluids, materials, control, new experimental capabilities, simulation tools, measurement procedures, etc.

The objective of this Special Issue is to present the most recent advances in these technologies such that readers can keep up with the rapid developments in this field. In this sense, papers on the following topics or keywords may be submitted:

- Commercial projects around the world;
- Central receiver power plants;
- Parabolic trough collectors;
- Linear Fresnel collectors;
- Dish/engine systems;
- Energy storage;
- Emerging concepts;
- Solar fuels;
- Facilities, controls, and modeling;
- Flux and temperature measurements;
- Solar resource assessment.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
