Message from the Guest Editor

Construction products assessment and sustainability is a complex, challenging, and still not fully defined issue. Building materials consume vast amounts of natural resources and generate a significant amount of waste. Thus, it is crucial to have verified information about the environmental consequences of their production, use, and recycling.

A Special Issue of Sustainability dedicated to evaluating construction products in terms of sustainability is an important initiative. I invite everyone interested in assessing construction products in the field of environmental impact to submit their work for publication in this Special Issue of Sustainability.

Keywords

- construction products
- sustainability
- assessment and verification of constancy of performance (AVCP)
- environmental impact
- life-cycle assessment (LCA)
- assessment methods
- environmental performance
- environmental performance assessment
- environmental product declaration (EPD)
- global warming potential (GWP)
- natural resources

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
