# Biodiversity in Different Regions: Exploring Global Ecology Sustainability

Guest Editors:

#### Dr. Kornsorn Srikulnath

 Special Research Unit for Wildlife Genomics (SRUWG), Department of Forest Biology, Faculty of Forestry, Kasetsart University, Bangkok 10900, Thailand
Animal Genomics and Bioresource Research Unit (AGB Research Unit), Faculty of Science, Kasetsart University, Bangkok 10900, Thailand

#### Dr. Prateep Duengkae

Department of Forest Biology, Faculty of Forestry, Kasetsart University, Bangkok 10900, Thailand

Deadline for manuscript submissions: closed (30 April 2023)

#### **Message from the Guest Editors**

Different global regions are at high risk of drastic environmental changes. The climate is warming and many species are in decline. Pollution is also affecting ecosystems and human health, with risks of sea level changes, disease, food security and climate extremes. Narrowly adapted and endemic species now face extinction as climate change impacts biodiversity, agricultural production and food security. Understanding how climate has shaped ecosystems and how drivers of environmental change (including human population growth and consumption, energy use, land use changes and pollution) impact biological systems are fundamental to global ecology sustainability. This Special Issue will highlight recent research on how ecological changes have impacted biodiversity in different regions of the world across many scales.

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. Sustainability publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
