Message from the Guest Editors

The aim of this Special Issue is to gather contributions from the wider spectrum of academic research related to the built environment, both across scales (from the individual building or component, to entire cities and regions) as well as systems (e.g., occupant's and user's behaviour, urban forms, and urban metabolism). The thematic range is left intentionally broad to facilitate and encourage the submission of works that are inherently multidisciplinary in nature, provided that any methodological component of the work relying on data-driven and machine learning methods is made strongly evident.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE](#) and [SSCI \(Web of Science\)](#), [GEOBASE](#), [GeoRef](#), [Inspec](#), [RePEc](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
