Message from the Guest Editor

Dear Colleagues,

Driven by the global campaign against climate change, the market of electric-powered transportation systems has boomed across the world in recent years. In that context, batteries play an essential role in propelling electromobility. A significant transition toward electric transportation relies upon battery innovation and secure materials for its design and development. The expanding selection of electric vehicles (EV) brings about a critical interest in battery design. There are also various difficulties in providing an increasing supply of EV batteries.

The main goals of this Special Issue are as follows:

- To encourage researchers, academicians, and industry experts to prioritize electric vehicle systems.
- To disseminate high-quality research works and advancements in electric vehicles and battery technologies and infrastructure.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
