Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on research using cutting-edge econometrics methods to evaluate the impacts of sustainable economic policies adopted not only by developed countries but also by developing countries. By doing so, researchers and policy makers can have a better understanding of the implications of current policies, and such insights can have important implications for making future policies. The topics include but are not limited to the following: effectiveness of pollution-controlling policies; impacts on human capital; lasting effects of sustainable policies; sustainable policies and firm behaviors; sustainable policies and trade.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: development economics; labor economics; public economics; international economics.

I look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
