

Advanced Modeling and Simulation for Application in Solar Radiation and Photovoltaic Systems

Guest Editors:

Dr. Manoharan Madhjarasan

Department of Electronics and Computers, Faculty of Electrical Engineering and Computer Science, Transilvania University of Brasov, 500036 Brasov, Romania

Dr. Sameer Al-Dahidi

Department of Mechanical and Maintenance Engineering, School of Applied Technical Sciences, German Jordanian University, Amman 11180, Jordan

Dr. Mohamed Louzazni

National School of Applied Science, Abdelmalek Essaâdi University, Tetouan B.P. 2117, Morocco

Message from the Guest Editors

This Special Issue provides a forum to address the complex challenges in modeling and simulation, devoted to intelligent methods and algorithms. Solar radiation and PV systems are fascinating and multidisciplinary research domains. Hence, this Special Issue presents an opportunity for professionals and researchers to explore novel strategies, zero energy building, EVs, and technical advancement, particularly highlighting the application of PV systems.

We hope that this Special Issue is of interest to academics, researchers, practitioners, scientists, and industrial delegates, enabling them to share and exchange their original and high-quality articles (new theories, methods, techniques, and applications) and to publish their latest results and progress in modeling and simulation application in the fields of solar radiation and PV systems.

Deadline for manuscript submissions:

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
