Message from the Guest Editors

Human well-being and environmental health are widely recognized as being closely linked, which necessitates going beyond traditional public policies and environment protection. The 2020 COVID-19 pandemic reminded us that to survive, humanity must think and act in terms of the interrelationships between human and environmental health. Emerging diseases caused by issues such as climate change, the contamination of animals and water, high exposure to chemicals and pesticides, and antibiotic resistance are major concerns that require an integrated vision of our planet's health. Recent advances in research have shown that it is possible to utilize new technologies to monitor environments in order to better understand the dynamics of factors that impact human health, and to model them in order to reproduce these dynamics and predict their evolution. This makes it possible to locate their sources and to implement management or control strategies to reduce their impact on both human and environment health.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
