

Energy and Water Integration System

Guest Editors:

Prof. Dr. Majid Amidpour

Prof. Dr. Catalina Spataru

Prof. Dr. José María Ponce-Ortega

Dr. Hooman Farzaneh

Dr. Weifeng He

Prof. Dr. Behnam Mohammadi-Ivatloo

Dr. Viviani Onishi

Deadline for manuscript
submissions:
closed (30 October 2021)

Message from the Guest Editors

The main priorities of the research are as follows (but are not limited to):

- Proposing high efficiency and cost-effective water treatment methods;
- Employing various renewable energies (in solo or hybrid form) with high energy conversion efficiency and low operating and investment cost instead of conventional fossil fuels;
- Investigating practical solutions for desalinating seawater for the main chain of the processing units;
- Applications of total site utility concepts for polygeneration of water and energy;
- Applying constructal theory concepts to build more resilient and high efficiency EWI systems;
- Proposing policies to further remove the existing obstacles for EWI and institutional arrangements for water–energy nexus decision-making;
- Recommending novel and practical solutions for environmental monitoring techniques;
- Using new or modified optimization techniques for highly constrained EWI systems based on mixed-integer linear programming (MILP) techniques;
- Regulations and standards needed for water–energy management;
- Planning of water–energy management strategies.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and
Applied Science, University of
Ontario Institute of Technology,
Oshawa, ON L1G 0C5, Canada

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
