Deadline for manuscript
submissions:
closed (31 October 2021)

Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on physical, chemical, and biological interactions within the critical zone, which includes aquatic (lake, streams, rivers, wetlands) and terrestrial (above and below ground) environments.

We encourage submissions that integrate processes within and between surface water, soils, hillslopes, vegetation and microbial communities, shallow and deep groundwater, and the vadose zone.

In this Special Issue, particular attention will be given to anthropogenic influence on the critical zone. Indeed, agriculture or mining could modify natural processes and understanding them would enhance our comprehension of the critical zone. It would also help us to preserve the critical zone and better sustain it.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
