Message from the Guest Editors

Dear Colleagues,

This Special Issue will include impactful papers focused on the critical role played by the resources able to build resilient socioeconomic systems.

This is a moment of great and traumatic change for societies in a traumatic way due to COVID-19, but it can unleash unparalleled opportunities to improve business production processes in eco-compatible terms, decision-making processes for public authorities and regulators, the safety for consumers, and ultimately the quality of life for citizens.

The concept of ecological resilience is at the heart of this change process and inspires new research questions on how to develop synergistic paths oriented towards resilience to build sustainable economic systems.

This Special Issue aims to investigate how the agro-food system's actors can develop resilient value creation processes to generate value for the consumers at the same time by improving environmental and climatic performance.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
