Message from the Guest Editors

Dear Colleagues,

The continued threat of COVID-19 has led to a considerable surge in the amount of information available on pandemics and epidemics in the last six months. Thus, a thorough analysis of the current pandemic will determine how soon the global economic and financial system is likely to recover and help in preparing for future outbreaks.

The purpose of this Special Issue is therefore to provide a platform for researchers to examine the challenges posed by pandemics to humanity and suggest ways of overcoming them. The issue welcomes original research articles, case studies, reviews, and critical perspectives in various aspects that establish the link between pandemics and sustainability using econometric tools.

Keywords: pandemics; coronaviruses; COVID-19; sustainable development; financial market; supply chain management; environmental pollution; big data; climate change; global demography; perception; applied econometrics.

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
