Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editor

The selection of a suitable material that achieves the sustainability concept is considered a significant step in the construction process—in particular, the selection of suitable materials that meet product performance goals at minimum cost. While there has been a major development in the material manufacturing technologies that aims to acquire the sustainability concept, the challenge remains to turn the use of advanced sustainability material into a value-adding framework for innovation in processes, technologies, and construction.

This Special Issue aims to investigate the ability to develop an eco-friendly sustainable construction through the use of advanced material while preserving the framework of environmental and social impact.

In particular, the main topics that this Special Issue should cover are:

- 1- The effect of the choice of advanced sustainable material on the life cycling of a constructed building;
- 2-The integration of advanced material in promoting the sustainability design in construction.

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, AGRIS, RePEc, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Environmental Studies*) / CiteScore - Q1 (Geography, Planning and Development)
